Amendments To The Abstract:

In the English translation document, please amend the section heading at page 18 line 1, as follows:

--ABSTRACT

The invention relates to a method for billing a service in a packet data network (PDN). According to said method, at least one type of billing is associated with at least one service that can be used by a user, and data representing the type and use of the service, in addition to the type of billing associated with the service or selected by the user, is stored during the use of the service selected by the user. The invention also relates to a billing system (VS) for carrying out the inventive method.
